THOMSON REUTERS JOURNAL SELECTION PROCESS

JOURNAL SELECTION : MAIN OBJECTIVES

1. To evaluate and select the best scholarly journal content available today for **coverage** in Web of Science.

As a result, the Web of Science is known as the worldwide source for top tier scholarly research published in the best international and regional journals.

2. Provide the worldwide publishing community with **objective standards** useful in building world-class publications.

Thomson Reuters has built lasting partnerships with the global scholarly publishing community. We work together to improve the quality of scholarly communication everywhere in the world.

Necessary information is provided based upon a consistent selection process

Each year over 2500 journals are submitted

Necessary information is provided based upon a consistent selection process

A continual process of **evaluation** and **assessment** of existing journals

Neural circuits underlying the pathophysiology of mood disorders

Author(s): Price, JL (Price, Joseph L.)^[1]; Drevets, WC (Drevets, Wayne C.)^[2,3]

Source: **TRENDS IN COGNITIVE SCIENCES** **Volume:** 16 **Issue:** 1 **Special Issue:** SI **Pages:** 61-71 **DOI:** 10.1016/j.tics.2011.12.011 **Published:** JAN 2012

Times Cited: 34 (from Web of Science)

Cited References: 99 [[view related records](#)]

Informative Journal titles

Abstract: Although mood disorders constitute leading causes of disability, until recently little was known about their pathogenesis. The delineation of anatomical networks that support emotional behavior (mainly derived from animal studies) and the development of neuroimaging technologies that allow in vivo characterization of anatomy, physiology, and neurochemistry in human subjects with mood disorders have enabled significant advances towards elucidating the pathophysiology of major depressive disorder (MDD) and bipolar disorder (BD). In this review, we integrate insights from human and animal studies, which collectively suggest that MDD and BD involve dysfunction within an extended network including the medial prefrontal cortex and anatomically-related limbic, striatal, thalamic and basal forebrain structures.

Ethical Literary Criticism: Its Fundaments and Terms

Author(s): Nie, ZZ (Nie Zhenzhao)

Source: FOREIGN LITERATURE STUDIES **Volume:** 32 **Issue:** 1 **Pages:** 12-22 **Published:** FEB 2010

Times Cited: 6 (from Web of Science)

Cited References: 5 [[view related records](#)]  [Citation Map](#)

Abstract: Ethical literary criticism is a research method to read, analyze and interpret literary works, to study literary authors and literary problems from perspective of ethics. The basic thought of this method is that literature is the art of ethics in nature as it is the special expressions of ethical ideas and moral life in a particular historical period. Literature is not art of languages but of text consisting of characters. It is not ideology or aesthetic ideology, but material form existing by literal text. Teaching or instruction is the essential attribute and first function of literature, but aesthetic appreciation is the second which serves the first. By use of terms such as ethics, incest, ethical taboo, ethical chaos, ethical consciousness, ethical situation, ethical identity, ethical choice, etc., the ethical literary criticism explains and comments the different life with its moral features from ethical perspective.

Regional Journals

- Importance is measured in terms of content specificity:
 - Will it **enrich coverage** of a subject?
 - Will it provide specific **regional perspective**?
- Publish excellent research targeted at a regional rather than international audience
- Citation Impact may be low to moderate – but **stable**
- Regional journals meet all journal selection criteria

By Jim Testa, VP, Editorial & Publisher Relations

updated 5-2012

Thomson Reuters is committed to providing comprehensive coverage of the world's most important and influential journals to meet its subscribers' current awareness and retrospective information retrieval needs. Today Web of ScienceSM covers over 12,000 top tier international and regional journals in every area of the natural sciences, social sciences, and arts and humanities.

But comprehensive does not necessarily mean all-inclusive.

WHY BE SELECTIVE?*

It would appear that to be comprehensive, an index of the scholarly journal literature might be expected to cover all journals published. However, as demonstrated, however, that a relatively small number of journals are responsible for the majority of significant scholarly results. This principle is often referred to as Bradford's Law.²

THE THOMSON REUTERS JOURNAL SELECTION PROCESS

James Testa, Vice President, Editorial Development & Publisher Relations

Thomson Reuters is committed to providing comprehensive coverage of the world's most important and influential journals to meet its subscribers' current awareness and retrospective information retrieval needs. Today Web of ScienceSM covers over 12,000 top tier international and regional journals in every area of the natural sciences, social sciences, and arts and humanities.

But comprehensive does not necessarily mean all-inclusive.

WHY BE SELECTIVE?*

It would appear that to be comprehensive, an index of the scholarly journal literature might be expected to cover all journals published. However, as demonstrated, however, that a relatively small number of journals are responsible for the majority of significant scholarly results. This principle is often referred to as Bradford's Law.²

In the mid-1930s, British mathematician and librarian S.C. Bradford made the point that the core literature for any given scientific discipline is composed of fewer than 1,000 journals. Of these 1,000 journals, there are relatively few with a very strong relevance to the given topic, whereas there are many with a weaker relevance to it. Those with a weak relevance to the given discipline or topic, however, typically have a strong relevance to some other discipline. Thus, the strong relevance literature can form itself around various core scientific literature becoming more or less topics, with individual journals becoming more or less relevant depending on the topic. Bradford understood that an essential core of journals forms the literature basis for all disciplines and that most of the important papers are published in relatively few journals.^{1,2}

More recently Thomson Reuters analyzed the 1,621 journals covered in the 2008 Journal Citation ReportsSM. The analysis found that 50% of all citations generated by this collection came from only 300 of the journals. In addition, these 300 top journals produced 30% of all articles published by the collection. Furthermore, this core is not static. Its composition changes constantly, reflecting the evolution of scholarly topics. Our selection process is designed to identify and evaluate journals for inclusion in the Web of ScienceSM and, whenever necessary, deleting journals that have become less useful.

THE EVALUATION PROCESSSM

Many factors are taken into account when evaluating journals for coverage in Web of Science, ranging from the qualitative to the quantitative. The journals are evaluated on the basis of their editorial content, the international diversity of its authorship, and the citation data associated with it are all considered. No one factor is considered in isolation, but by combining and interpretation of data, the Thomson Reuters editor is able to determine the journal's overall strengths and weaknesses.

The Thomson Reuters editors who perform journal evaluations have educational backgrounds relevant to their areas of responsibility. Because they monitor virtually every new scholarly journal published, they are also experts in the literature of their fields. The evaluation of a journal for coverage in Web of Science begins with the submission of current issues. The publisher must deliver three consecutive current issues, one at a time as they are published, to Thomson Reuters. Publishers may send print issues online, or both. Publishers may send print issues to the following address: Publication Processing, Thomson Reuters, 1500 Spring Garden Street, Fourth Floor, Philadelphia, PA 19130. For submission of an online journal, the publisher must provide access information as <http://science.thomsonreuters.com/info/journalsubmission/>. This form is also appropriate for all types of online journals, including those that publish articles one at a time rather than collected in periodic issues.

Once timeliness has been established, Thomson Reuters has the option to proceed with the other aspects of the evaluation process. This process rarely begins immediately, however, due to the high volume of journal submissions and the editorial priorities set by Thomson Reuters for Web of Science coverage. When the evaluation has begun, all issues received will be considered. It is important, therefore, that all issues be received in a timely manner. Publishers or authors should continue sending timely issues until the evaluation process has been concluded. If as any time the journal publisher or editor seeks an update on the status of the evaluation for a specific journal, an inquiry may be sent via the form at <http://ip-science.thomsonreuters.com/info/jmcaai-status/>.

THOMSON REUTERS

How Can I Improve My Journal?

1. Enrollment of more internationally high impact researcher in journal editorial board
2. Active recruitment of high-impact articles by courting researchers
3. More careful article selection
4. Offering authors better services
5. Boosting the journal's media profile

THOMSON REUTERS

學術期刊出版之目的與特色

- 目的

- 記錄研究發現: 累積人類智慧結晶
- 傳播研究成果: 針對區域與國際之學術社群
- 創造新知: 發掘新理論, 新知識, 新方向

- 特色

- 特定族群: 作者與讀者需具備專業知識
- 專業審查: 同儕的認同與審核—審查者
- 公開可及: 永久被記錄保存並可循一定的管道與工具查詢

學術期刊出版者

- 營利出版者
 - 專業出版社
 - 企劃/編輯/設計/美工/印製/發行
 - 營利為目的
 - 通常需有廣大市場支持
- 非營利出版者
 - 學會; 大學出版社(校/院/系所/圖書館)
 - 支持學術傳播為目的
 - 支持小眾學術族群

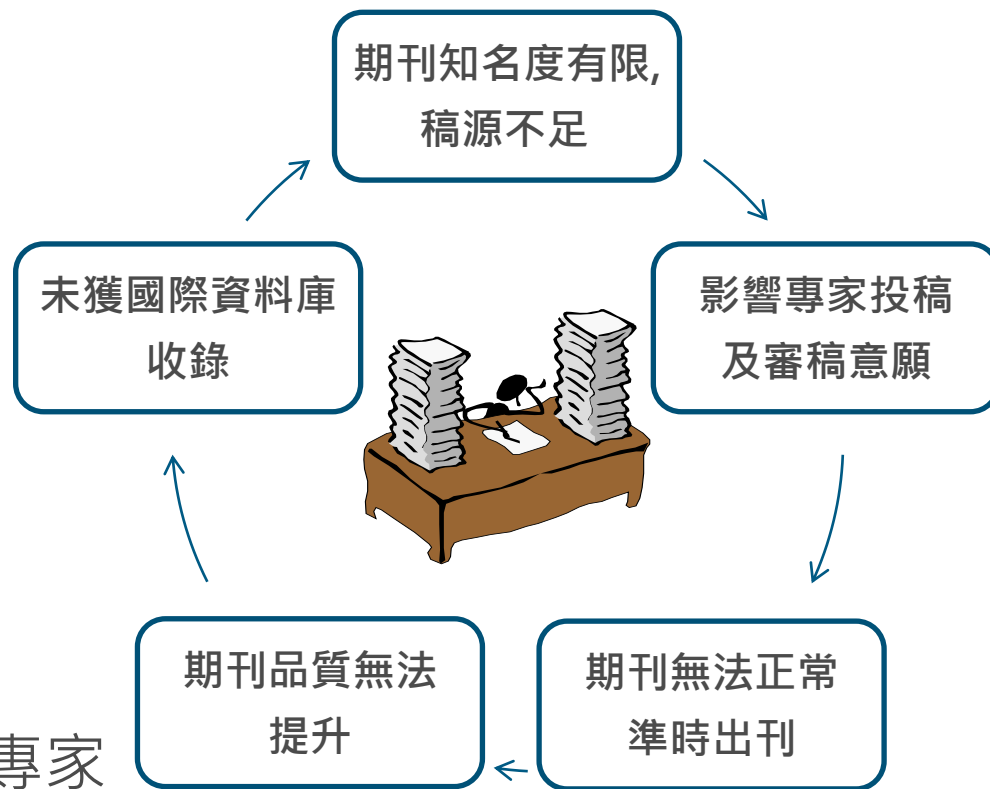

非營利學術出版者常見問題

- 期刊能見度/知名度

- 稿源不足
- 影響投稿/審稿意願
- 無法準時出刊
- 品質無法提升
- 未被國際資料庫收錄

- 期刊出版流程

- 找不到適當審查者
 - 找不到相關領域專家
- 期刊審稿作業繁複

解決方案

- 投審稿系統

SCHOLARONE™

- 即時傳遞投審稿訊息
- 加速投審稿作業流程
- 確保投審稿作業標準化
- 國際通用之平臺

- 行銷推廣服務

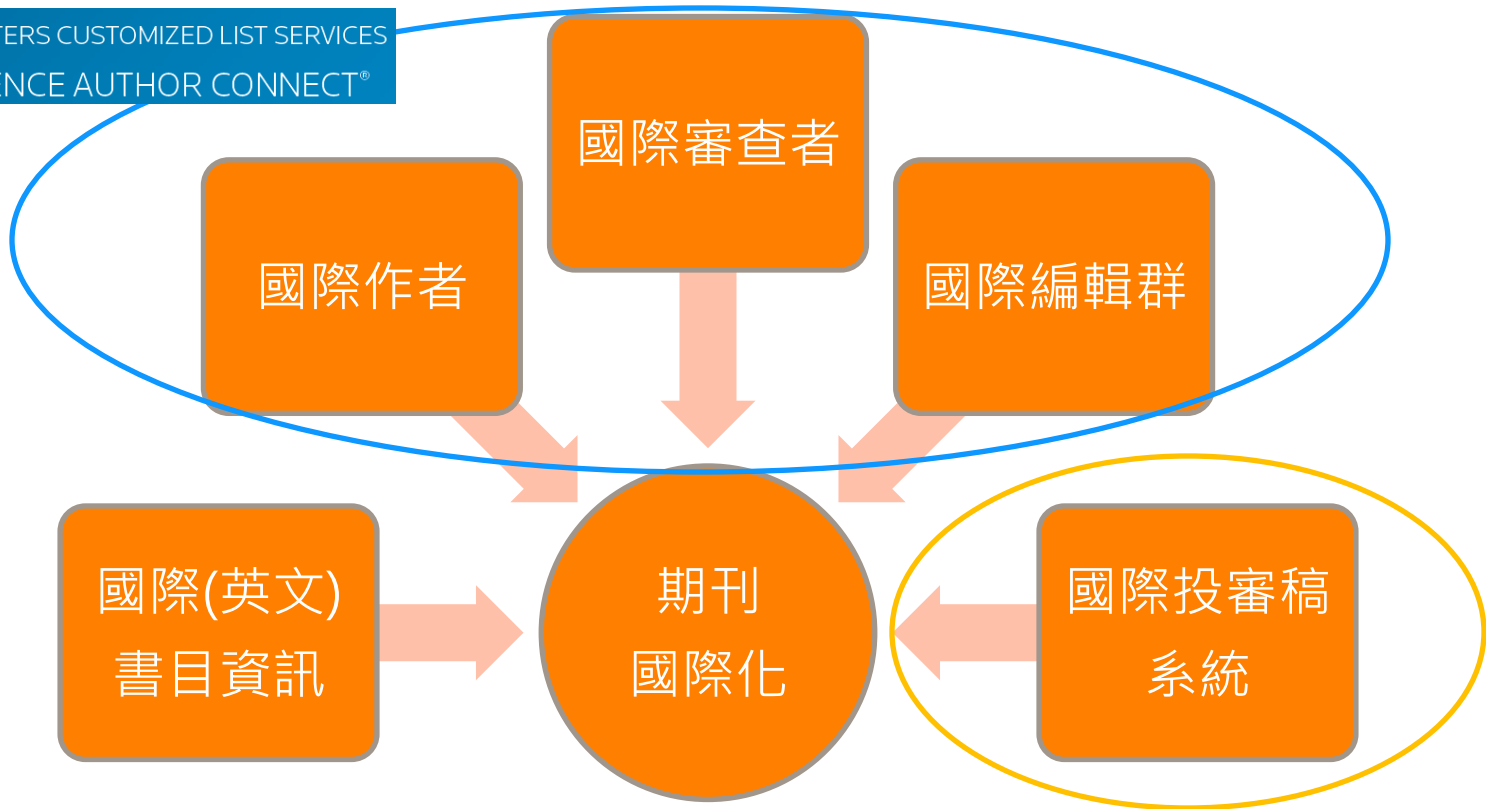

THOMSON REUTERS CUSTOMIZED LIST SERVICES
WEB OF SCIENCE AUTHOR CONNECT®

- 辨識某主題重要的研究者
- 針對目標讀者發布通告

- 期刊徵稿通告/期刊徵求審查者通告/新到目次通告

學術期刊國際化

☐ Unpack zip files - [instructions](#)

When this option is selected, files with a .zip extension are unpacked following upload and files contained within them added to your 'My Files' list.

The 'File Designation' selected adjacent to the zip file (above) will be applied to each of the files contained in the zip file.

Please note that this functionality is subject to the following restrictions.

Zip File Size:

The approximate maximum total file size accommodated will vary by your connection speed.

- Dial-up connections will typically allow files up to 1MB in total size to be uploaded.
- Cable/DSL home connections will typically allow files up to 4MB in total size to be uploaded.
- Office network connections will typically allow files up to 40MB in total size to be uploaded.

If your files are too large for your connection to accommodate, please upload them in multiple smaller groups.

Total Number of Files:

Your zip file may contain up to 20 individual files, each up to 1.5MB in size.

Step 1: Type, Title, & Abstract Edit

Manuscript Type: Original Article

Title: The Thomson Reuters Journal Selection Process

Running Head: Journal Selection Process

Abstract: The evaluation process consists of evaluation of many criteria such as, Basic Journal Publishing Standards (including Timeliness of publication, adherence to International Editorial Conventions, English Language Bibliographic Information (including English article titles, keywords, author abstracts, and cited references). Thomson Reuters also examines the journal's Editorial Content, the International Diversity of it authors and editors. Citation Analysis using Thomson Reuters data is applied to determine the journal's citation history and/or the citation history of its authors and editors. This paper includes a detailed description of the Journal Selection Process.

邀請函

15-Apr-2012

Dear Dr. Chang:

Manuscript ID WKR0-2010-05-0011.R1 entitled "Some properties" with Mr. Sobolev as contact author has been submitted to the Client Demo Workflow 0.

I invite you to review this manuscript. The abstract appears at the end of this letter, along with the names of the authors. Please let me know as soon as possible if you will be able to accept my invitation to review. If you are unable to review at this time, I would appreciate you recommending another expert reviewer. You may e-mail me with your reply or click the appropriate link at the bottom of the page to automatically register your reply with our online manuscript submission and review system.

Once you accept my invitation to review this manuscript, you will be notified via e-mail about how to access Manuscript Central, our online manuscript submission and review system. You will then have access to the manuscript and reviewer instructions in your Reviewer Center.

I realize that our expert reviewers greatly contribute to the high standards of the Journal, and I thank you for your present and/or future participation.

Sincerely,
Workflow 0 Admin Center Contact

Subject: Manuscript ID WKRO-2010-05-0011.R1 now in your Reviewer Center - Client Demo Workflow 0

15-Apr-2012

Dear Dr. Chang:

Thank you for agreeing to review Manuscript ID WKRO-2010-05-0011.R1 entitled "Some properties" for the Client Demo Workflow 0. Please try your best to complete your review by 15-May-2012.

In your review, please answer all questions. On the review page, there is a space for "Comments to Editor" and a space for "Comments to the Author." Please be sure to put your comments to the author in the appropriate space.

To access just the manuscript for review directly with no need to enter log in details, click the link below:

http://mc.manuscriptcentral.com/clientdemo0?URL_MASK=JPD2nRry5qwCZ9fXM34x

To login to your account on the Client Demo Workflow 0 - Manuscript Central site at <http://mc.manuscriptcentral.com/clientdemo0>, your case-sensitive USER ID is hanwen.chang@thomsonreuters.com. For security purposes your password is not listed in this email. If you are unsure of your password you may click the link below to set a new password.

http://mc.manuscriptcentral.com/clientdemo0?URL_MASK=Sb8TqxD2SYR3Dt8bXmf

Once you are logged in, the Main Menu will be displayed. Please click on the Reviewer Center, where you will find the manuscript listed under "Awaiting Reviewer Scores." You can click on the manuscript title from this point or you can click on the "View Details" button to begin reviewing the manuscript.

If you wish to view the manuscript and the review form simultaneously, click on the HTML or PDF icons - the manuscript will open in a new window. Leave the new window open, switch back to the main window, and open the score sheet by clicking on the Score Sheet tab. Follow the instructions for reviewers provided in the Manuscript Central site. I strongly encourage you to elaborate on your review in the space provided. Your specific comments will offer valuable feedback to improve future work. you submit it to the Editor. Otherwise, none of the information you provide will be used. If you have completed your review and are ready to submit it to the Editor, click on "Submit Review".

All communications regarding this manuscript are privileged. plagiarism must immediately be reported to me.

Thank you for evaluating this manuscript.

Sincerely,
Client Demo Workflow 0 Editor-in-Chief
